449

David,

as is away until next week, in case you wish to take a view more quickly. Its an 8 minute clip.

Looks fairly straightforward to me. I remember telling to enforce and get good evidence. sums it up below. only put vehicle observed for 4 or so minutes but actually we got it for twice that long. Not a huge deal. PCN valid.

seems to sit in the vehicle for a long time with Hazrads on. We see eventually get out. Go to the boot and get a briefcase. then goes into a nearby house. This are is near the chelsea football ground. after 8 or so minutes we pan away. Vehicle is partially on the footway, on a cycle lane and near a Bus stop. Peds, cyclists and Buses all slightly hindered by going around vehicle.

No sign of any "Gold Chain" Activity. Even if it had happened before we saw vehicle or after, it's a long time to wait.

Hey

I have done that clip for you & placed it in your folder for checking clips. I have named it - Mayors Vehicle.

Couple of things about this the 1st is that this vehicle is observed/seen for nearly 8 mins not the 4 mins as stated on the PCN & during this time you see the leave the vehicle take what looks to be a brief case out of the boot & go in to one of the houses next to the bus stop. None of this was stated on the PCN which would have been good to have as further information. Not too sure as to why it was issued as 17:13 time of offence as cam is not changed until 17:18 during which time you see all the evidence.

Kind regards
