

how. It was back in 2010.

We have just started enforcing camera 253 with the keep left only this morning as the CCTV signs have been up for 7 days.

94

This site was approved by email from Councillor Nick Botterill for the keep left.

However it has also always been the plan to try to deal with the weight limit in the road (as the Resident is up in arms about this as well) and I also want to do the Bus lane.

The email below only mentions the keep left. I assume we won't have too many issues if we go ahead and do the weight limit, Bus lane and in the future deal with parking related problems???

Obviously I think we would deal with Parking by possibly giving advance notification to the Business Units with Highways assistance but that won't happen until we get approval sorted so that's not an immediate issue.

Any thoughts?

Hi

Found the approval. Sorry it wasn't ECM.

Cheers

Chris

I have no problems with this as it will only catch people who are executing a deliberate and dangerous manoeuvre and not for example someone who has made a slight misjudgement with a box junction and gets a ticket.

Nick Botterill

Nick,

We have had several requests from residents for us to stop drivers passing the width restrictions on the wrong side. Some have suggested CCTV Camera enforcement, and this would be the most effective method of ensuring compliance.

93

In the light of the controversy which cameras attract in some places, are you happy for us to pursue the installation of a camera here? We can pay for it with St George s106 money.

Chris
