Dear all

Think this is easily solvable.

We will find out the grading for each match and the police requirements and make sure parking services are aware - speak to the football office.

Parking may lose the cameras towards the end of the day shift and Saturday pm.

At the end of the day these are crime and disorder cameras primarily and we must have priority.

This is the second complaint I have had in a month regarding traffic enforcement compromising their use. I accept we should be informing you and will ensure that improves

Thanks

Dave

Thanks

However I do already get something like this as I am on Highways distribution list for special events and Home football games for years. I see most games are cat B and A this year. I think only the QPR / Newcastle game was a cat C previously.

My CCTV operators well know the sensitivity of the football games and we are used to the sometimes sudden changes that may entail. Most of my CCTV operators have been with me for 4- 6 years. They are very experienced and know the CCTV system very well.

We have just finalised our Permanent Council CCTV team and hope to have all 8 CCTV staff in post in a few months. They will all be CRB checked and are BTEC II/III trained. We will eventually do away will all agency staff I foresee.

The main problem we have is clear information on what is happening in advance of the game and what is exactly expected of us to help out on the day to make it easy for your requirements.

With the new tech problems with the CCTV system (lack of links and extra operators on the system that we maybe unaware of) we are left to play it by ear sometimes. My CCTV team find Fulham area unusable due to tech problems on busy Football games and camera images are changing automatically or go blank. So they are forced to operate in the Hammersmith area from FTH and HTH until the system stabilises. All this affects how we enforce Traffic restrictions even away from the football area.
