**Attachments:** Box Junction list for Highways CAD 2011.xls; Camera Location details status 010811.xls; CCTV Traffic sites schedule for Unattended cams potential 2011.xls

David,

An update. I have proofed the Box junction/Traffic map and also the "Owner CCTV" maps and given them back to this morning, who will now work on finalising them. He will also produce a 3rd map from this that show cameras we have access to and ones that we don't with the reasons, all colour coded. I have also asked for a 4th map of the traffic bollards in the Borough with keep left signs on them to work on to see if we can do this.

I attach the 2 x work documents that I supplied to to help him. This document is about the cameras and who owns them to the best of my knowledge and also the reasons we are not using them where applicable. So is a bit more refined and easier to understand than the Traffic sites list I made. However I have also filled that one out as well.

I have also put near future planned ones in. All this will go on the map which I hope will be ready soon to make it easier to look at all this. I have asked to copy you in on any pdfs He sends to me while I am away.

I have filled out the sheet as best I could but its all quite complicated so will become easier with the maps. However done the best I could for ownership and reasons.

As for guessing the number of cameras needed. That's a tough one. It is a very rough guess and I have run out of time today as I underestimated the time this would take me to think about this, as I did not want to duplicate sites. As one camera could do parking Bus lane and MTC so need to factor that in. I had a quick count up a few times and came up with between 35-45 roughly!! However this does not include all main roads for parking etc etc.

I would have to carefully look at this again to be honest and would have a better idea when we have the CCTV maps ready so we could do some refinement on this issue.

<<Box Junction list for Highways CAD 2011.xls>> <<Camera Location details status 010811.xls>> <<CCTV Traffic sites schedule for Unattended cams potential 2011.xls>>

Hope this gives you what you want.

---

**Importance:** High

I had to rush away last night and forgot to collect the maps. Can you please leave them with on 5th floor and I will collect them next week.

Can you please update the attached to show ownership where there are cameras which we do not have access to and the reasons why not?

ID	LOCATION	ON EGIS?	Box type	STATUS
